CERTIFICATE

This is to certify that the seminar report, “**EASYSPLOIT**” is the bonafide work of **FOSTIN J THOOMKUZHY** in partial fulfillment of the requirements for the award of the Degree of Master of Computer Applications under APJ Abdul Kalam Technological University during the year 2018.

Fr. Rubin Thottupuram

Head of the Department

Ms. Gloriya Mathew

Internal Guide

ABSTRACT

EASYPLOIT is an advanced pentesting framework and a Metasploit automation.

Penetration testing (also called pen testing) is the practice of testing a computer system, network or Web application to find vulnerabilities that an attacker could exploit. Pen tests can be automated with software applications or they can be performed manually. Either way, the process includes gathering information about the target before the test (reconnaissance), identifying possible entry points, attempting to break in (either virtually or for real) and reporting back the findings.
